

# Josh Davey

## Personal Statement:

### Designer, Developer, Photographer

Creativity, commitment and passion are three key characteristics that describe me.

After several years working as a freelance photographer, I have spent over 3 years expanding my creative skillset through study. Through this I have discovered a passion for digital development, from the creative to the technical.

I enjoy the creative freedom of design and bringing a story to life through creative means. On the technical side, building websites and programs that improve the lives of others is something that I find fascinating and am looking for opportunities to be part of teams that do this.

I'm looking for a role where I can utilise and grow my existing web and graphic design skills, as well as working in a team that produces meaningful work that improves the world around us.

## Education:
